## FINAL SESSION OF M. E. CONFERENCE

Dr. Virgil W. Tevis, Formerly of Seymour, Delivered Address This Afternoon. -

Visitors Express Appreciation of Entertainment.—Thanks Proffered Rev. Mr. Allen.

The Methodist Conference of the Seymour district, which has been in session since Monday, adjourned this thanks to the members of the church afternoon, after the address of Dr. and to Rev. H. H. Allen for the invita-Virgil W. Tevis, who was pastor of the local church at the time the presference, as a whole, has been one of manner in which the arrangements for tion. the Conference were made.

evening was given by Dr. Harry Andrews King, president of Moores Hill College, and was one of the most eloquent addresses ever heard in the local church. He spoke upon an educlearly the necessity of a college training.

At the meeting Tuesday afternoon the program was carried out as was announced. The committee having in O. F. was held last night, A. A. Da- tect the presence of smoke. charge the course of study reported that C. J. Galbraith, of Franklin, and John Anderson, of Ogilville, had taken successfully the examination for the first year's work and recommended that they be advanced to the second year. At the same session twentyfive ministers were relicensed. Several of these have moved to this district, after having resided in other parts of the state for several years.

A committee composed of Revs. Hayden H. Allen, of Seymour; A. H. Pitkin, of Columbus, and J. M. Larmore, of Utica, presented a notice recommending that the District Conference be held as a district institute. According to the rule of the Conference, one year's notice must be given before the Conference can be changed into an institute.

A committee was appointed this morning to select a place for the next Conference, arrange the program and set the time for the meeting. The presiding officer appointed the pastors of Seymour, North Vernon, Columbus and Brownstown as members of the committee. The district superintendent, Dr. M. B. Hyde, will act as chairman.

The committee on the admission on trial to the Annual Conference recommended that W. E. Brown, of Bean Blossom; W. M. DeHart, of New Washington, and H. M. Reynolds, of Freetown, be made members of the Annual Conference.

At the sessions Tuesday afternoon and this morning a number of reports and delegates, and the annual reports filed with the clerk, Rev. E. F. Schnei-

The report by the district clerk was given this afternoon. It showed that during the-year there were 962 conversions in the district. During the same period there were 615 members to join the church by probation and 195

of the district performed 701 marriage ceremonies during the year; 285 members are subscribers to the Western Christian Advocate and 249 to the Epworth Herald. The report as given was accepted and ordered to be made a part of the minutes.

The committee on resolutions presented before the delegates a resolution expressing their appreciation of the service of the district superintendent, Dr. M. B. Hyde. The ministers DELEGATES PASS RESOLUTIONS also put themselves on record as ORIGIN favoring the step made in the liquor campaign. They also pledged themselves to assist in every legitimate Several Pieces of Furniture Valued way in enforcing the local option law and expressed themselves as favoring this measure, as a step toward stateiwde prohibition.

A resolution was also adopted stating that the visitors were highly pleased with the entertainment given while in this city, and expressed their tion to hold the meeting in this city.

All the meetings have been well atent building was erected. The Con- tended and much interest has been manifested in the addresses and disthe most interesting ever held in this cussions. The program is regarded mystery. district, and Rev. Hayden H. Allen, as one of the strongest ever arranged pastor of the Seymour church, re- for a district conference, and was ered has not been used as a living ceived many compliments as to the heard with a high degree of apprecia-

The place for the next meeting will The principal address Tuesday be announced within a few weeks, after the matter is decided by the committee having that in chagre.

### IN HOURS OF PLAY

ANIMALS MAKE GOOD USE OF THEIR LEISURE TIME.

Authenticated Cases Which Prove the Brute Species Are Aware of the Value of Relaxation-Merry Antics of Monkeys.

All animals, from ants up to whales and elephants, play together in youth, and some are fond of taking such diversions at intervals through life. One might search the world over and not find more playful creatures than puppies and kittens, but there are other dumb animals which not only frisk about, but actually descend to practical jokes.

A Brazilian parrot once succeeded in making a railway party believ that they had run over a child. Sudden cries, followed by a low moaning, rang out from beneath the wheels. The train was stopped, and the employees nervously searched the track, but no child was to be seen. No clue to the situation was to be found until a large green parrot, swinging in his cage, uttered a mocking laugh.

A monkey on shipboard used to amuse himself in the cook's absence by turning the water-cocks in order to enjoy that worthy's surprise when he returned and found the water running over the floor; and there are scores vent its getting back; they thus store deception practised by animals to

tempt deceiving its master by going "This field network consists of fine through the action of killing a fly, and and by means of a transformer it is iron wire, the wires being spread then assuming an air of success. It was barely announced that the Republicans of Pennsylvania wanted to take Mr. tions in oats and corn on the Chicago Knox away from the Taft administraboard of trade which first brought tion and put him in charge of the fortune to Mr. Patten. For years he state's affairs at Harrisburg, when the was unlucky in wheat, the market secretary of state issued a statement, getting away from him just as he was which President Taft requested him to make, saying he would not leave In April, 1909, however, he put the cabinet. The statement followed through the most successful wheat a long conference between the presicorner Chicago ever has known and dent and his secretary of state in won the title of "Wheat King." He | which Taft urged Mr. Knox to remain forced the price of May wheat to \$1.34 | at the head of the state department, and unloaded with a profit estimated and in that connection the president at more than \$5,000,000. At the head made some very flattering statements of the bear clique, opposed to Patten with regard to the service that Knox in this deal, was J. Ogden Armour, is rendering to his country in the management of its foreign affairs.

In September, 1909, Patten by The president without reservation daring trading brought himself out of assured Knox of his unqualified supthe matter of the court of arbitral

## OF STATE CAPITAL ROW

HERE'S always something doing in Oklahoma. They have enjoyed statehood a little more than three years, but seldom a day passes that you cannot pick up a newspaper and find the newest star in the flag doing something.

Charles N. Haskell, governor of the state, is one of those strenuous persons who keeps in the limelight, and the newspaper men in Oklahoma consider it a poor day when the chief executive doesn't do something to make a story. Oklahoma hadn't shed its territorial

garb very long before its legislature passed that bank deposit guaranty was greatly inter- law. That certainly attracted some attention, and it got much more publicity when the Democrats in convention at Denver made it the basis of one of the party's platform planks. Next came the muss that resulted

in Haskell's retirement as treasurer White House from of the campaign committee. Then came the land fraud charges, which have never been thoroughly threshed Now it is a fight over the state

capital, and Governor Haskell may be found in the thick of the battle. The It was at a dinner to the Prince and capital has been located in Guthrie since Oklahoma became a state, but mandamuses and such things were in

As soon as he heard the result of the vote Governor Haskell prepared to move to Oklahoma City. He moved in an automobile and established his At the Fushimi dinner Miss Taft office in a hotel. The secretary of state went with him, but didn't take sistant secretary of state got a duplicate seal and has been doing business in Guthrie.

# TUMOR OF YEARS

Removed by Lydia E. Pinkham's Vegetable Compound

Holly Springs, Miss. — "Words are inadequate for me to express what yourwonderful med-

as you told me to I am glad to say that now I look and feel so well that my friends keep asking me what has helped me so much, and I gladly recommend your Vegetable Compound."—MRS.WILLIE

mysterious pains, inflammation, ulcera-tion or displacement, don't wait for time to confirm your fears and go through the horrors of a hospital opera-tion, but try Lydia E. Pinkham's Vegetable compound at once.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and such unquestionable testimony as the above proves the value of this famous remedy, and should give everyone confidence.

about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

KIND TO KIDS.

Clara-He's a kind-hearted automobilist, isn't he?

Clarence-Expectionally so. I never knew him to run over even a child unless he was in a hurry.

German Alcohol Stills. An authority on alcohol stills says that there are 20,000 farm stills in operation on as many farms in Germany. The German government permits the farmer to produce a certain amount of grain or potato alcohol, the amount depending upon the size and location of the farm and the annual demand for the product, upon the payment of a reduced revenue tax. Alcohol distilled in excess of the quantity allowed is subject to the higher rate of taxation. Denatured alcohol, however, is not subject to any tax.

The Luggage Question. DeLancey Nicoll, lawyer, is always a well-dressed man, and abominates a

slovenly appearance. At the Union club he said of a westerner one day: "He has come on to New York for a week and I don't believe he has brought a stitch of luggage with him."

Here Mr. Nicoll smiled. "Unless, indeed," he added, "he's stowed something in the large bags he carries in the knees of his trou-

### ALL ABOUT THE HOG

SOME STORIES OF THE USEFUL, IF UNORNAMENTAL, ANIMAL.

Razorback Variety May Be Depended Upon to Furnish Something New -How Woodpeckers Fooled Drove of Arkansas Man.

The group on the porch was talking about razorback hogs and the storekeeper was telling a story.

"There was a feller travelin' through here," he said, according to the St. Louis Post-Dispatch. "He was a stranger in these parts. One day he came across a bunch o' hawgs that had big slits in their ears. He figgered at them slits. They was too big fer brands. What else could they be? After a bit a native come down the trail. 'Jess lookin' at them hawgs.' said the stranger. 'You was,' says the native. 'D'ye min' tellin' me what them big slits in their ears is fer?' said the stranger. 'Not at all,' says the native. 'Have you noticed these hills?' 'What d'ye mean?' 'Noticed how steep they is?' 'Yes, I have.' 'Wal' says the native, 'that's it. We have to put them slits in the hawgs' ears so they kin stick their hind legs through 'em and rough lock themselves down these hills to keep from killin' themselves.'"

There was a salvo of very hearty outdoor laughter at this, and Mr. Antwine stirred behind his newspaper.

"That remin's me of one they used to tell down on the Arkansas line," he said. "There was a feller goin' through there, too. He saw a drove o' razorbacks carryin' on mighty queer. There was about 20 of 'em, and they acted like they was crazy. They would run fust to one tree an' then to another, tryin' to climb it. Then they would spin aroun' on their noses, crack their tails, an' squeal in the most plaintive way you ever heard. The traveler watched them hawgs fer 15 minutes, an' the more he saw of 'em the more they puzzled him.

"Finally he went on through the woods till he came to a house. There was a man out in front. He was baskin' in the sun. 'Is them your hawgs up there in the hills?' the stranger asked. 'Yep,' says the native.

"At that the traveler stepped up an' looked his man in the eye. 'Say,' he said, 'what in the Sam Hill's the matter with them hawgs?'

"The native kin' o' half smiled. "They does act queer, don't they?' he said. 'I should say they does.' 'Wal, it's this way,' said the native. 'We had a hard winter in here this time an' there was no feed in the hills for them hawgs. Ah had to let 'em have corn. a bad col' Ah couldn't holler pigooeey any more. Ah had to call 'em up by hittin' the corncrib with a ax handle, an' now,' he says, lookin' up the hill, 'them damn woodpeckers is settin' them crazy."

Were Glad to End Season.

A New Yorker who has just returned from London gives one explanation of the promptness with which Englishmen closed their town houses after the death of the king and so readily consented to give up all entertainments for the rest of the present

"Londoners were in many instances very much relieved to shirk a season of expenditure," he said, "because this has not been a good year financially for them. They were not anxious to spend any more money than necessary, and when court mourning gave them a dignified opportunity to close up their houses and skip a season they were very well satisfied that they could do this without having to have undertaken anything so unconventional on their own responsibility. So nobody need think that English houses in London will be opened later in the season or that there will be anything like the usual entertaining

Typewritten Signatures.

"I had a letter from a friend today." said a literary man, "giving me a wigging for signing my typewritten let. St. Vitas Dance, Epilepsy and all tons are used. It also makes the dress told him I had written the letter with KIRO REMEDY CO., 256 Detroit St., Flint, Mich. was proper to sign it in type. If I had written the letter with a pen. I proper, though I admitted it would not pass as a legal signature. However, I was not writing a legal document and a signature in the text of the letter was perfectly good form. That is my contention now and if anybody can prove that I am wrong I'd like to hear his argument."

Dolls' House Many Years Old. There are at least two famous dolls? houses in England; one is at Nostell priory, the Yorkshire home of Lord and Lady St. Oswald. This dolls' house dates from 1690 and it contains some exquisite Chippendale furniture made in miniature. The dolls which inhabit it are dressed in gorgeous old brocades and the dinner service off which they eat is of silver. The other dolls' house is in a house near Petersfield and if not quite so valuable is nevertheless very beautiful and a much cherished possession. A curious fact in connection with the lovely Chippendale furniture, some of the finest specimens known at Nostell priory, is that the receipted bills for it are also preserved there, conclusive ly proving that it is genuine.

## THE REPUBLICAN A GREAT ROAD IS PARALYZED

Freight Movement On Grand Trunk at Standstill.

### PASSENGER TRAINS LIMPING

Manned by Officials of the Road and Newly Hired Brakeman, the Passenger Trains Are Kept Moving, but on Thoroughly Demoralized Schedules -Serious Trouble Is Expected When Company Attempts to Move Freight.

Detroit, July 20.-Fifteen thousand employes are idle as the result of the strike on the Grand Trunk. For the movement is paralyzing and so serious of Swamp-Root, the great kidney remedy is the tie-up on the line between Toronto and Detroit that high officers of the road turned conductor and are running trains in place of the strikers. Both the switchmen's and firemen's Judge Supreme Court, Third District unions are ready to call sympathetic sample bottle and a book that tells all strikes if necessary.

outbreaks reported from different points in the state and a short-lived Judges of the Appellate Court, Sec- Port Huron-Detroit passenger train ond District-Daniel W. Comstock, was attacked at Milwaukee Junction,

The system's freight traffic is tied up from Portland and Montreal clear ington is now sending out the early trains are limping through from an through to Chicago. Its passenger reports of the census for 1910. The hour to two hours late, manned by crews of old conductors and newly

If there is to be any graver trouble will be made within a few days has been confirmed by A. B. Atwater, assistant to President Hays for the lines west of Detroit and St. Clair rivers. The road is hiring men now to take out the freights. From talks with the strikers it is gathered that they think The Home Missionary Society of the themselves in excellent position to Presbyterian church will meet with push their demands for increase, amounting to 36 per cent of their for-

### A PARK TRAGEDY

Young Woman at Evansville Shot by Mysterious Assailant.

Evansville, Ind., July 20.-A piece of steel corset stay driven into the flesh by a rifle bullet may end or save the life of Miss Ida Gainer, aged twentythree, who was shot in the back while walking in Sunset park in the central "Do you think they get any fun out part of the city. Miss Gainer was crossing the park, intending to start home about 9 o'clock, after going down town on an errand. There was a rifle crack and the young woman sank helpless to the ground, clutching helplessly at one of the benches. The person who fired the shot has not been apprehended.

Barnhart Renominated.

South Bend, Ind., July 20.—Henry A. Barnhart of Rochester was renominated for congress by the Democrats of the Thirteenth district at their convention here. The nomination was made by acclamation, and the only feature came in the congressman's speech of acceptance, which included attacks on the tariff, Republican congressional leaders and the administration of Pres-

## The Cause of Many

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused I by it-Leart disease, pneumonia, heart failure of apoplexy are often the result of kidney disease. If kidney trouble is allowedtoadvance the kidney-poison-

ed blood will attack the vital organs, causing catarrh of the bladder, brick-dust or sediment in the urine, head ache, back ache, lame back, dizziness, sleeplessness, nervousness, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result better health in that organ is obtained quickest by a proper treatment of the kidneys. Swamp-Root corrects inability to hold urine and scalding pain in passing it, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and immediate effect is soon realized. It stands the highest because of its remarkable health restoring properties. A trial will convince anyone.

Swamp-Root is pleasant to take and is sold by all druggists in fifty-cent and one-dollar size bottles. You may have a about it, both sent free by mail. Address, With the exception of a few mild Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name. Swamp-Root, and don't let a dealer sell you something in place of Swamp-Rootif you do you will be disappointed.

Caught at the Crossing.

Fort Wayne, Ind., July 20.-Calvin H. Vanauken, aged seventy-four, a widely known civil engineer, was killed in Auburn, when the carriage in which he was driving across the Lake Shore railway tracks was struck by a passenger train. With him were his three granddaughters, but none of them was fatally hurt.

Cincinnati, July 20.—George B. Cox says Judge O. B. Brown of Dayton will be nominated by the Republicans of Calo for governor on the second ballot of the convention. "A friend of mine is willing to bet \$5,000 that Brown is nominated," says the big boss, "5,000 that he will carry Hamilton county and \$5,000 that he will be elected, or any part of this amount on any proposition."

State of Ohio, City of Toledo,

will retire in favor of a permanent president.

"The board of trustees contemplates the restoration of the endowment (which is desirable), must be slacked already in a condition to apply from fund," said Admiral Stockton.

"Changes will be made in the eduversity placed on a solid basis in every way. In the administration of educational affairs I will be aided by Doctor McBain, dean of the school of political sciences, who is an educator quicklime is to put it in a few large acre. of marked ability."

Born in Philadelphia October 13, 1845, as the son of Rev. W. R. Stockton, Rear Admiral Stockton was appointed to the United States Naval academy when a young man and graduated in 1885. While still a cadet he served abroad the Macedonian in the summer of 1864 during the blockade of Confederate ports. After the war he went to the Pacific squadron and later was transferred to the Philadel-phia navy yard. After serving on several vessels at the New York navy yard and at the hydrographic office he was ordered to the Washington navy yard as lieutenant commander.

In 1889 he was placed in command of the Thetis, and three years later he was ordered to the Naval War college for special duty. After two years in command of the Yorktown he was chosen president of the Naval War

perts will attack the problems of these forest

EXPERIMENT IN

MAKING OF PRINT PAPER

The new building has just been formally dedicated and the fine equipment of machinery and testing apparatus which is to make It the most complete laboratory of its kind in the country is rapidly being installed. The staff of some twenty government investigators has already arrived and been established in the suite of offices in the new building and for some months have been delivering lectures before the students of forestry.

In the new laboratory the United States forest service and the University of Wisconsin will co-operate in the investigations which will be made to solve problems confronting the paper manufacturers, lumbermen, builders and others who deal with the products of the American forests. The building itself, which cost some \$50,000, and the site upon which it stands, south of University avenue, between Camp Randall and the Chicago, Milwaukee and St. Paul railroad tracks, were furnished by the university. The equipment was furnished by the government at a cost of about \$75,000 and the staff of investigators is also maintained by government appropriations. These men, in addition to their laboratory work, will deliver lectures in the regular forestry course of the university. The laboratories, too, although devoted chiefly to the government experiments, are open to the faculty and students for advanced research along the lines of study undertaken by the experts.

The laboratory, which faces north on University avenue, is a fine fireproof building of dark brown trick, trimmed with white Bedford stone and roofed with red tiles, with a 180-foot frontage and a depth of 80 feet. Immediately east of the building a private spur from the railroad carries the lumber into the laboratory yards. A derrick is to be erected north of the track for unloading the big logs and stumps for the experiments from the flat cars. Immediately opposite, south of the track, is to be installed a small sawmill with a saw which will cut timbers up to 20 feet in length.

Already logs of long-leaf, short-leaf and loblolly yellow pine have been sent in to the laboratories by lumbermen and paper manufacturers at Kenwood, La., Hattiesburg, Miss., Thornton, Ark., and spruce logs from the Maine woods. A number of fat pine stumps for the turpentine, rosin and alcohol tests have also been received.

Sheds for air drying the lumber line the west side of the yard, which is to be graded and covered with cinders. Immediately back of the building is a deep, cement-lined pit to hold the creosote to be used in experiments until it is pumped out into the laboratory tanks.

The problem of making a satisfactory print paper from materials other than spruce and hemlock is one which will receive particular attention, and for this purpose a complete paper making plant has been made a part of the laboratory equipment. Every process, from the breaking of the wood into chips for the first treatment by soda and sulphite solutions to the final running of the sheets of paper through the calendering rolls to pro- to the tanks and measured. The difference duce a finished surface, will be followed care- between the amount drawn off and that origi- light, and eight stone tables, besides those pathologist, and A. W. Schorger, Ohio State fully, so that the results of substitution of nally forced in, deducting the oil collected running all about the room beneath the win-university, chemist.

the state university, in which government ex- various woods for the usual materials will be noted at each stage of manufacture.

Both soda and sulphate processes of treatment of the chips will be used and the laboratory will make its own sulphite liquor in a vat adjacent to the digestors, in which the wood is cooked by steam until the lignin is all dissolved and only the cellulose left. A blast of high-pressure steam drives the chips against the side of the digestor, further dividing the cellulose fibers, and then the whole mass is pumped out by a centrifugal pump into a tank in which it is stirred until the fiber is still further broken up. Over and over it is run through "riffler" troughs and over screens where suction draws out the fiber to be used and leaves behind the small chips, splinters and other waste.

When the liquor has been washed out of it in a washer driven by an electric motor (a contrivance much like the housewife's washing machine) it is put into a press and the water is squeezed out of it. Such of the pulp blocks from the press as are not wanted immediately are then in convenient form to store away on shelves.

After going through the beating engines the refined pulp is run on to the screens of the paper machine and taken up by felt rollers, from which it goes to wooden rollers and then between metal rollers to the steam-heated drying drums, where the wet sheet is run back and forth until it is ready for the final smooth finish of the hot steel calendering rolls. Any grade of paper can be made on this machine, from the roughest brown paper to fine correspondence paper, in a running sheet 15 inches wide, and even a water-marking device is attached, so that the impression can be made on the wet sheet before it goes through the rollers and on to the winding drum at the

How to make timber last longer by protecting it with preservatives from the various borers and fungous growths which attack wood will be another important problem to which considerable time and laboratory space are to be given.

Beneath the building is a great pit, heated by steam to a temperature most favorable to rot, and there, in separate glass compartments all about the walls, are to be samples of timbers with the various fungous growths and animal and insect enemies of the wood attached. The progress of their effect upon the wood will be closely watched and compared with that of the same pests upon samples of the wood treated with different preservatives,

prepared and applied in the room above. A big skylight and many windows make the preservative laboratory an excellent place to work and every facility is provided for testing the various forms of preservatives and antiseptics to protect timbers, such as those in mines and water-front piers, which are much subject to the attack of minute animals and plants.

Into two great treatment cylinders the timbers are shoved and steam pumps force the oil from tanks above at high pressure into the cylinders. When no more oil will enter the cylinder, even under 150 pounds pressure per square inch, it is drawn off and again returned

from the vapor condenser, gives the exact dows, give room for the apparatus and experiamount absorbed by the timber, which is al ways weighed before and after treatment as a further means of calculating the oil absorbed.

In a small cylinder the preservative may be applied at a pressure of 600 pounds per square inch for smaller specimens and the resulting protection can be compared with that of the lower pressure preservatives.

Open tanks are provided for tests of preservatives that do not require pressure. These are heated with steam coils and an iron cage hung above lets the railroad ties or other timbers down into the hot oil. By a trolley arrangement the cage can be lifted and run across to other tanks filled with cold oil, so that it is not necessary to pump out the hot oil and replace it with the cold, as in laboratories where there is but one set of tanks.

All about the inner walls of the preservatives laboratory are ranged shelves to accommodate the samples of wood for treatment and those already submitted to the different forms of protection against rot and other attacks.

What woods will best stand various kinds of strain, in bridges, buildings and different structures will be determined in the timber testing laboratory, where two seven-horsepower motors furnish the electric current to run the machinery.

In the torsion machine timbers can be twisted until the strain reaches 30,000 inchpounds. Five "Universal" testing machines are provided to test the strength of different woods under slow pressure, one having a capacity of 100,000 pounds, another twice that, and three other smaller ones 30,000 pounds.

To see what sudden strains oak, pine, maple and different woods will withstand a Hatt-Turner impact machine was built in the machine shops of the Purdue university and sent to the forestry laboratory for experiments. It can be so gauged that the hammers, ranging in weight from 50 to 250 pounds, can be dropped from heights up to six feet upon the beam or block of wood, exerting a sudden pressure of hundreds of pounds.

In a laboratory where so much machinery is in constant use there must be facilities for instant repairs. For this purpose one end of the laboratory is fitted up into a machine shop. Here, too, much labor is saved by use of electricity to run the engine lathe, milling machine and other necessary apparatus. Beside the anvil there is a gas forge for heating and tempering steel.

The equipment of the wood shop, where timbers and samples of wood are to be prepared for tests, is very complete.

Steam heated ovens for drying wood, in order to test the shrinkage, warping tendencies and water content of different woods are a part of the laboratory equipment, and a portion has also been set off for a seasoning

In this connection, in another laboratory, tests will be conducted to discover the heat conductivity of different woods, to assist in the work of the kiln drying and preserving

Stumps and other resinous portions of the trees now burned as trash will be put into stills and retorts and the turpentine, tar and gases will be extracted, carried off, separated and refined into the various commercial products. If methods of doing this economically can be fixed upon, the problem of utilizing much of the big pine trees now wasted will

All of the many chemical tests made necessary by the work of the different departments will be centered in a big chemistry laboratory on the second floor, where eight large win-

As some of the tests will produce strong fumes, there are tables encased in glass with hoods and ventilators above to carry off the smells and small doors through which the experimenters will work.

A corner room is set apart for special work in distilling turpentine and other products and special unlighted space is provided as a chemicals storage room. Still other unlighted spaces are reserved as photographic darkrooms and record vaults for the safe keeping of the valuable reports of the work done.

One of the most interesting offices is that of the pathologist who has charge of the experiments with the fungi and other enemies of the woods. Upon his desk are large collections of glass tubes containing cultures of every sort of vegetable growth which feeds upon wood fibers, and samples of all the minute animalculae which attack timbers. Many he secured last summer in his visits to mines in different parts of the country, since one of the greatest sources of the dangerous mine cave-in is the destruction of supports by these little enemies.

A large drafting room, lighted from the north and east, a library and filing room, a lecture hall and a suite of 17 offices for the staff officials and their clerks and stenographers complete the building arrangements below and in the attic a space for storing materials which cannot be left in the open yard and which is reached by an elevator from the

The government will appoint to regular work in the laboratory, as an addition to the present staff, several of the students who have been doing forestry work the past winter at the University of Wisconsin.

The forestry lecture course of the university, just closed, included this year, besides the regular work under State Forester E. M. Griffith, lectures by W. L. Hall, assistant forester at the Washington office; R. S. Kellogg, who holds a similar position; Franklin H. Smith, in charge of the wood utilitization office of the government at Chicago; H. F. Weiss and H. S. Bristol, assistant directors of the new laboratory; L. F. Hawley, in charge of the wood distillation of the laboratory, and Frederick Dunlap, in charge of the kiln drying investigations.

At the time of the formal dedication of the laboratory the various departments of the government work were in full operation, that the visitors may see the actual work in progressjust how paper is made; how timbers are tested; how stumps are distilled, and how the little marine animals are prevented from boring through shipping.

The staff of the new laboratory is as follows: McGarvey Cline, Purdue '04, director: H. S. Bristol, Yale, and H. F. Weiss, Yale, assistant directors: H. D. Tiemann, Stevens Institute of Technology, in charge of technology; Ralph Thelen, University of California, mechanical engineer; W. H. Kempfer, University of Michigan, in charge of maintenance; Edwin Sutermeister, Massachusetts Institute of Technology, in charge of wood pulp laboratory; E. Bateman, Yale, in charge of chemistry; L. F. Hawley, Cornell, in charge of wood distillation; Frederick Dunlap, Cornell, in charge of kiln drying operations; F. W. Bond, Massachusetts Institute of Technology, in charge of wood preservation; C. T. Barnum, Cornell, and C. P. Winslow, Yale, engineers in wood preservation laboratory; J. A. Newlin, Purdue, in charge of timber tests: H. E. Surface, Ohio State university, engineer in wood chemistry; H. E. McKenzie, University of Maine, engineer in timber tests; C. J. Humdows on the east and south furnish admirable phrey, University of Nebraska and Cornell,

THE BIGGEST.

She-What is the biggest fish story you ever heard? He-Jonah and the whale.

BOY TORTURED BY ECZEMA

"When my boy was six years old, he suffered terribly with eczema. He could neither sit still nor lie quietly in bed, for the itching was dreadful. He would irritate spots by scratching with his nails and that only made them worse. A doctor treated him and we tried almost everything, but the eczema seemed to spread. It started in a small place on the lower extremities and spread for two years

"Finally I got Cuticura Soap, Cuticura Ointment and Cuticura Pills and gave them according to directions. I used them in the morning and that evening, before I put my boy to bed, I used them again and the improvement even in those few hours was surprising, the inflammation seemed to be so much less. I used two boxes of Cuticura Ointment, the same of the Pills and the Soap and my boy was cured. My son is now in his seventeenth year and he has never had a return of the eczema.

until it very nearly covered the back

part of his leg to the knee.

"I took care of a friend's child that had eczema on its face and limbs and I used the Cuticura Soap and Ointment They acted on the child just as the did on my son and it has never returned. I would recommend the Cuticura Remedies to anyone. Mrs. A. J. Cochran, 1823 Columbia Ave., Philadelphia, Pa., Oct. 20, 1909."

When Father Helped.

The fond father held the manuscript while his son practised the ora-

"Shall we permit the ruthless hand of the hydra-headed tyrant," cried the youth, "to-to-to-well, what is it?" The father was wrestling with the manuscript.

"Oh, yes," he muttered, "here it is: 'to dessicate.' Go on."

"It's desecrate," cried the boy, indignantly. "'Shall we permit the ruthless hand of the hydra-headed tyrant to desecrate the-the-thewhy don't you prompt me?"

The father was staring hard at the manuscript.

"The-the poodle-paddle-poodleum of our liver ties," he stammered. "It's the 'palladium of our libertles," roared the boy. "Gimme that paper-I'll say it meself."

And he stalked away angrily. Oh, Mr. Wright!

Wilbur Wright was talking to a Dayton reporter about the Daily Mail's \$50,000 aerial race from London to Manchester.

"It was shocking, though," said the reporter, "that Graham White, an Anglo-Saxon flying man, let himself be beaten by a Frenchman."

Mr. Wright smiled. "Shocking?" he said. "It was more than that. It was a-Paulhan."

In New York.

Up-to-Date Gladys-Is it really such an improper play?

Up-to-Date Dorris-Oh, it isn't just er to see, but it's all right for us girls.

### WOMEN'S WOES

Seymour Women are Finding Relief at Last.

It does seem that women have more than a fair share of the aches and pains that afflict humanity; they must "keep up," must attend to duties in spite of constantly aching backs, or headaches, dizzy spells, bearing-down pains; they must stoop over, when to stoop means torture. They must walk and bend and work with racking pains MAKES SPEECH ON THE BORDER FIGURES and many aches from kidney ills. Kidneys cause more suffering than According to Federal Report For the any other organ of the body. Keep the kidneys well and health is easily maintained. Read of a remedy for kidneys only that helps and cures the kidneys and is endorsed by people you

# TAFT FAVORS

Advocates Closer Trade Relations With Canada.

Up in the Extreme Northeastern Corner of the Country the President Addressed a Mixed Audience of Canadians and Americans and Evoked Cheers From Both by Sentiments Expressed.

Eastport, Me., July 20.-President Taft got up to the northeastern corner close 989 saloons in the state, the most and sore and no words can fully des- of the country yesterday afternoon of these having been closed since Jan. cribe the misery I endured. I could when the yacht Mayflower dropped according to the federal report for the able to remain on my feet for any line. It was the first time a president ever came to Eastport, and the village was bubbling with joy. The president told the crowd when he came ashore that it was a vacation time for him and that he would not talk politics, because Taft is about the only national figure save James G. Blaine and

> The town had made great preparation for the visit, and when Mr. Taft reached the Peavey library, from in front of which he spoke and hinted at reciprocity with Canada, the nearby streets were jammed with people, mostly Americans, but here and there a Canadian. There were no warships in the harbor to fire a presidential salute, but two veterans of the civil war, one with a flowing white beard, trundled out an ancient muzzle-loader and laboriously filled her up and shot the twenty-one guns that is paid the chief executive. Before he spoke the president and members of the party were driven through the town. The streets were gay with red, white and blue streamers and bunting. At the library Mayor Garnett introduced the pres-

"I am now," said Mr. Taft, "at one of the four corners of the great American nation. I have been to Seattle, San Diego, and the southernmost point of Florida, and now I am at Eastport. I have found the same people and the to thousands, who take colds, coughs same progressive civilization at each point and also in between. When a man has had that privilege he may be said to understand the nation. True, tney talk a little more through their nose sore, chills and fever, pain in noses up here than they do down enue will give out the figures for the back of head, and a throat-gripping south, but I have noticed that the style entire state in his preliminary report cough. When Grip attacks, as you of women's bonnets is the same here

mercial reciprocity which he has tried to bring about between this nation and Canada. "You are close to Canada here," he said, "and I hope that I am sorelungs, Hemorrhages, Coughs, addressing some Canadians. You are Coughs, Colds, Whooping Cough, close enough to value them as neigh-Bronchitis, Asthma, its supreme. 50c. bors. That is a great country. Speaksay that a closer commercial relation will do well for both countries, and if in the next wear we can make arrangeagreement whereby Canadian relations This will be the sixth study in the that the more prosperity the one has trade of one as it grows means additional trade for the other.'

The Mayflower this morning sailed for Bar Harbor.

### Fraud Is Alleged.

# A BOTANICAL

Nature in her wisdom and beneficence has provided, in her great vegetable kingdom, a cure for most of the ills and ailments of humanity. Work and study have perfected the compounding of these botanical medicines and placed them at our disposal. We rely on them first because of their ability in curing disease, and next because we can use them with the confidence that such remedies do not injure the system as do the strong mineral concoctions. Among the very best of these botanical preparations is S. S. S., a medicine made entirely of roots, herbs and barks in such combination as to make it the greatest of all blood purifiers and safest of all tonics. It does not contain the least particle of harmful mineral to injuriously affect any of the delicate parts of the system. S. S. S. cures Rheumatism, Catarrh, Soras and Ulcers, Scrofula, Malaria, Skin Diseases, Contagious Blood Poison, or any blood affection or disease even reaching down and cleansing the circulation of all inherited blood troubles. As a tonic S. S. S. is unequaled. It builds up the system in the proper way, by purifying the blood and supplying a sufficient amount of vigor and nourishment to the body. If you are suffering with any blood trouble, or are in any way run-dowr in health, you could not do better than take S. S. S. a purely botanical blood remedy. It cures without ever leaving any unpleasant or injurious effects. It is perfectly safe for young or old. Book on the blood free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.
